

NEW FAIRFIELD PUBLIC SCHOOLS
New Fairfield, Connecticut

MEMO TO: All Building Staff, Students, Parents and Vendors of Meeting House Hill School

FROM: Mr. Philip Ross, Director of Buildings and Grounds

DATE: September 4, 2007

RE: Asbestos Materials in Meeting House Hill School

In keeping with State and Federal regulations, the occupants of Meeting House Hill School must be notified, annually, of the presence of Asbestos Containing Building Materials (A. C. B. M.'s) in this school.

This memo serves as that notice. Please be aware that there still remain asbestos floor tiles throughout the school along with asbestos ceilings in the 200 wing classrooms. There is also some asbestos pipe insulation in crawl spaces and above ceilings. These materials are routinely inspected and can safely remain in place.

There is an Asbestos Management Plan in place for the New Fairfield School District. This plan contains all of the information related to A. C. B. M.'s in our school buildings. This plan is available for your review, should you request it.

Please contact Philip Ross, Director of Buildings and Grounds, at 312-5779, if you have any questions or if you would like to make an appointment to review the Management Plan.
